## **DETAILED ACTION**

## Allowable Subject Matter

Claims 1-5, 7, 8 and 10-12 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art taken alone or in combination fails to anticipate or fairly suggest the limitations of the claims, in such a manner that a rejection under 35 USC 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1, 4, 7 and 10.

Specifically regarding claim 1, Chen et al. (5448649) teaches the state of the art of optical image retrieval.

But, Chen et al. fails to explicitly teach directing a transmitted light passing through the optical device to the image contacting surface under the transparent medium for producing the optical image signal and reflecting the optical image signals returned from the image contacting surface to a lens, as claimed.

Specifically regarding claims 4 and 7, Chen et al. (5448649) teaches the state of the art of optical image retrieval.

But, Chen et al. fails to explicitly teach images are also retrieved on a non-transparent medium, as claimed.

Specifically regarding claim 10, Chen et al. (5448649) teaches the state of the art of optical image retrieval.

But, Chen et al. fails to explicitly teach directing the light reflected by a lens unit twice to an image contacting surface under a transparent medium and wherein an image retrieval optical axis overlaps with the optical axis of the light reflected twice by the lens unit, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
